**RE: FPL Group Endorsement of Comments of the Edison Electric Institute on the
Interim Final General Guidelines and Draft Technical Guidelines Under Section
1605(b) of the Energy Policy Act**

The Interim Final General Guidelines and a Notice of Availability for the Draft Technical Guidelines were published in the Federal Register of March 24, 2005, soliciting comments that are now due on June 22, 2005.

FPL Group's principal subsidiary, Florida Power & Light Company, serves more than 4 million customer accounts in Florida and owns or operates 13 Fossil Fuel Plants and 2 Nuclear Plants in Florida and Georgia. FPL Energy, LLC, an FPL Group energy-generating subsidiary, is a leader in producing electricity from clean and renewable fuels with a growing national presence currently operating in 24 states. FPL submits this endorsement of comments in response to the Interim Final General Guidelines and a Notice of Availability for the Draft Technical Guidelines.

FPL Group by this endorsement of the comments of the Edison Electric Institute on the Interim Final General Guidelines and Draft Technical Guidelines Under Section 1605(b) of the Energy Policy Act, urges DOE to incorporate the comments of EEI into the Interim Final General Guidelines and the Draft Technical Guidelines. The endorsed comments recognize the position of generators with low emissions rates and those that have made early-on reductions.

Page 2

FPL Group thanks DOE for the opportunity to provide comments on the proposed Interim Final General Guidelines and the Draft Technical Guidelines and appreciates your consideration of EEI's suggestions and will gladly discuss our Company's position in more detail at your convenience. We look forward to participating with DOE to shape the developing process in such a manner that we may continue to participate in this voluntary program.

Respectfully submitted,

Randall R. LaBauve
Vice President
Environmental Services
